---

Thanks to everyone for all your help on this site.

I know you have a lot of work on this site and other sites.

We (Region 6) are under a lot of pressure from the community and elected officials to complete the feasibility study so that we can make a decision in selecting the remedy for the site.

We appreciate anything you can do to get the report to us in early April 2016. CAS

Subject:

Hi Gary,

I am traveling all this week myself and I do not get home until tomorrow night. The hurricane modeling is still coming along slowly because the model domain is big (it includes all of Galveston Bay and as well as the original San Jacinto River model). I have been hampered because the second Linux server I was using to perform all the modeling crashed about a 1.5 months ago. It is currently being rebuilt by a computer IT person at ERDC. I hope that it is running again by next week.

Earl
